RESEARCH

Job Market Paper

“Capital Misallocation at the Intersection of Race and Gender: Evidence from Small Businesses” (with Carlena Ficano).

Decomposes the average revenue product of capital into a markup (output-market) wedge and a credit wedge using the restricted-access Kauffman Firm Survey, showing that product-market disadvantages are at least as important as credit frictions and that pooled race-only or gender-only comparisons obscure sharp heterogeneity at the intersection of race and gender.
